IMMEDIATE RELEASE
BUSINESS WIRE
MONDAY MARCH 3, 2003

SAN JOSE, CA—IWSsales, Inc. San Jose, California today announced launching the socket 370 i810TV Mini-ITX fully embedded Mainboard. Having dimensions as small as 17cm x 17cm the Mini-ITX is world's smallest and highly integrated platform delivering total solutions with Intel Pentium III Celeron FC-PGA processor on socket 370, with 2D/3D graphics, AC'97 audio, 10/100 Ethernet, watch dog timer, and asynchronous 640x480 to 1024x768 VGA graphics to TV out targeted for digital multimedia applications. Available now, the i810TV comes with low cost PC133 SDRAM socket and one PCI slot for expansion.

The embedded platform is fully compatible Microsoft® Windows® XP, Windows 9x, and Linux Operating Systems.

The socket 370 mini-ITX made by IWSsales is the revolutionary embedded Mainboard that easily enables designers to utilize it in applications like Digital Entertainment & Information Systems where there is a rapid growth and need to have TV interface. Such a small, powerful and very cost effective Mainboard like IWSsales i810TV can be utilized in Industrial Embedded applications and all other applications that need to use the Television as a display device with a very small form factor.

Such a complex and highly integrated Mainboard still can be purchased below US \$50 in volume production to meet the low cost and high performance goal of many designers and systems integrators.

IWSsales delivers value added and revolutionized total turnkey solution to its OEM clients by custom designing, marketing, and manufacturing high-performance and cost-effective solutions. IWSsales is headquarters in San Jose, California in the heart of Silicon Valley and has branch offices in the Taipei - Taiwan, and Europe. The company is privately held.
