For Immediate Release

IWSsales, Inc. releases the Ultimate Fanless solution for Set-top-boxes using the VIA EPIA M1000 mainboard for the Home Entertainment and Hospitality Systems

Now the VIA EPIA M10000 mainboard can be used in additional applications where there is a Odb fan noise.

San Jose, California – 2004: IWSsales, Inc., the innovator and developer of a custom heat sink deploys the state of the art conventional heat sink solution to allow the VIA EPIA M10000 to operate in fanless environment.

The high performance conventional heat sink application is designed and manufactured by IWSsales, Inc. is built around the VIA EPIA M10000 mainboard featuring rapid heat absorption and dissipation out from the chassis. The solution offers heat absorption away from the three major components, from the C3 processor, the CLE266 and the South bridge where there is no more need to use any fan neither on the CPU nor on the chassis.

The solution is modular, designed for customization per application to form fit in the set-top-box of choice and size whether in height or width.

IWSsales delivers value added and revolutionized total turnkey solutions to its OEM clients by custom designing, marketing, and manufacturing high-performance and cost-effective products to fit customers demand. IWSsales is headquartered in San Jose, California in the heart of Silicon Valley and has branch offices in the China - Taiwan, and Europe. The company is privately held.
